NOIRÉ

EAU DE PARFUM

The Art of Presence

A COMPLETE GUIDE TO WEARING LUXURY FRAGRANCE

BY THE NOIRÉ COLLECTIVE · 2026

NOIRÉ · A LETTER BEFORE YOU BEGIN

You are holding this guide because something about fragrance caught your attention — and you trusted that instinct. What follows is not a product manual. It is an education in the art of wearing scent with intention.

Fragrance is the most personal of all luxuries. Unlike a watch or a jacket, it cannot be seen — only felt, remembered, and experienced. It enters a room before you do and stays after you have left. Used correctly, it becomes inseparable from how people remember you.

This guide exists because most people were never taught how to wear fragrance properly. They apply it incorrectly, store it wrong, choose it for the wrong reasons, and wonder why it never quite works the way it should.

By the end of these pages, you will know everything you need to make fragrance work — and work memorably — for you.

05 The Fragrance Wardrobe — Beyond a Single Bottle · 5

01 · THE SCIENCE OF SCENT

How Fragrance Actually Works

Every fragrance is a composition — not a single smell but a sequence of smells that unfold over time. This is why a perfume smells different when you first spray it than it does two hours later.

Perfumers divide this journey into three acts:

TOP NOTES — The opening act. Bright, fresh, immediate — citrus, green, light florals. They last 15 to 30 minutes and are designed to create a first impression, not a lasting one.

HEART NOTES — The true character. Florals, spices, woods. These emerge after the top notes fade and last 2 to 4 hours. This is the fragrance you are actually choosing when you buy.

BASE NOTES — The memory. Oud, musk, amber, vetiver. These develop slowly and last the longest — up to 14 hours on skin. They are what people remember about you hours later.

"Never judge a fragrance in the first ten minutes. You are only meeting the introduction."

---

02 · THE APPLICATION RITUAL

How to Wear It Correctly

✦ Moisturise pulse points before applying — hydrated skin holds fragrance up to 3 hours longer

- ✦ Hold the bottle 10 to 15cm from skin — this distance creates an even veil, not a concentrated patch
- ✦ Apply to wrists, base of throat, nape of neck — these pulse points radiate body heat
- ✦ Never rub wrists together — friction crushes the top notes and collapses the fragrance journey
- ✦ Wait 3 to 5 minutes before dressing — let the fragrance bond with skin first
- ✦ One to four sprays maximum for an EDP — restraint is power with high-concentration fragrance

"The ritual takes four minutes. The impression it creates lasts fourteen hours."

03 · FINDING YOUR SIGNATURE

The Art of Choosing

Most people choose a fragrance the wrong way — at a counter, on a strip of paper, in a brightly lit shop, after already smelling six other things. Every one of these conditions is wrong.

A fragrance must be experienced on skin — your skin specifically — for at least three wears before you can judge it honestly. Your skin's pH, temperature, and natural chemistry are all active ingredients in the final composition.

THE THREE-WEAR RULE

> **WEAR ONE** — Meet it. Let it open on your skin. Notice what you feel in the first hour.
>
> **WEAR TWO** — Understand it. Notice how it evolves. Does the base note suit you? Do people respond?
>
> **WEAR THREE** — Decide. By now the fragrance has shown you everything it is. Either it has become part of you or it has not. You will know.

Signs you have found your signature:

- ✦ You stop noticing it on yourself — but everyone else still does
- ✦ You reach for it without thinking each morning
- ✦ People ask what you are wearing before they ask your name
- ✦ You feel slightly wrong without it
- ✦ You buy a backup before the first bottle is finished

"A signature scent is not chosen. It is discovered — usually by accident, always by feel."

04 · THE NOIRÉ COMPOSITION

What You Are Wearing

NOIRÉ is not a collection of ingredients — it is a composition. Every element was chosen for a specific role in the fragrance's journey from first spray to final hour.

TOP NOTES	HEART NOTES	BASE NOTES
Citrus · Green Accord Floral Bouquet · Cardamom · Black Pepper Oud · Musk · Amber · Vetiver	First 30 minutes Hours 1 to 4 Hours 4 to 14	The introduction The character The memory

> *Heat and humidity change how fragrance evolves on skin. Most Western formulas were not designed for these conditions — the top notes evaporate too quickly and the base collapses. NOIRÉ's composition was engineered specifically to perform in India's climate — opening correctly, evolving naturally, and lasting the full 10 to 14 hours it promises.*

---

05 · THE FRAGRANCE WARDROBE

Beyond a Single Bottle

A fragrance wardrobe does not require twenty bottles. It requires intention. Most people who wear fragrance well own three to five — not because they need variety but because different contexts call for different expressions of presence.

> **THE ANCHOR** — Your signature. The one you reach for instinctively. Rich, deep, identity-defining. NOIRÉ is built to be this.
>
> **THE DAYTIME** — Lighter, fresher, lower projection. For offices, long days, warm weather. Something that announces quietly.
>
> **THE SEASONAL** — One fragrance that changes with the year. A fresh aquatic for summer. A heavier resinous wood for winter.

"Start with the anchor. Everything else follows naturally once you know who you are when you walk into a room."

NOIRÉ

EAU DE PARFUM

The Art of Presence

A COMPLETE GUIDE TO WEARING LUXURY FRAGRANCE

BY THE NOIRÉ COLLECTIVE · 2026

"Presence is not worn.
It is declared."

You now know more about fragrance than most people will ever learn. The science of how it works, the ritual of how to wear it, the art of how to choose it, and the composition of what makes NOIRÉ specifically worth wearing.

The only thing left is to experience it.
